## Abstracts

The global N-Pentane market size is expected to reach \$ 182 million by 2032, rising at a market growth of 2.8% CAGR during the forecast period (2026-2032).

Pentane is colourless with a very low odour and high volatility thanks to its low, narrow boiling range – it is among the lowest boiling hydrocarbon liquids and so evaporates at a very high rate. It is used principally as a blowing agent in foam production, as a propellant in aerosols and as reaction media for polymerisation processes. In actual production, pentane blend is the most common type. Isopentane and Normalpentane Blend contain Isopentane and Normalpentane as the main ingredients. The single principal content is not less than 10%, not more than 90%. Pentane blend is a very fast evaporating hydrocarbon solvent and low in impurities such as sulphur, olefins, benzene and total aromatics. Examples of end uses for this solvent are blowing agent, electronic cleaning and polymerisation. In the report, we main cover pentane blend.

Global N-Pentane key players include Shell, Phillips 66 , CNPC, ExxonMobil Chemical, etc. Global top four manufacturers hold a share about 45%.

Asia Pacific is the largest market, with a share about 50%, followed by Europe and North America, have a share over 40 percent.

In terms of product, Pentane 60/40 is the largest segment, with a share about 30%. And in terms of application, the largest application is EPS Blowing Agent, followed by Electronic Cleaning, Chemical Solvent, Aerosol Propellant, ect.

This report studies the global N-Pentane production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for N-Pentane and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
