Abstracts

N95 Surgical Respirator Masks or Surgical N95 respirators are commonly used in healthcare settings and are a subset of N95 filtering facepiece respirators, often referred to as N95s. A properly worn N95 respirator can filter out up to 95% of particles in the air, thanks to its tight fit and synthetic material, which is made up of a web of tiny fibers charged with electrostatic energy. KN95 masks, which are the Chinese equivalents of N95s, are meant to meet the same filtration standard.
