Abstracts

The global Nagarmotha Oil market size is expected to reach \$ 710 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032). In 2025, global sales of nagarmotha oil reached 537 tons, with an average price of US\$935 per kilogram.

Nagarmotha Oil has a woody earthy dry spicy cedar agarwood-like odour. Also known as Cyprus Oil it is sometimes used as a cheaper all-natural replacement for Oud or Agarwood. It is not as deep, rich or animalic as Agarwood so best used with some of the natural oil or with one of our bases.

The raw material for nagarmotha oil is the dried rhizome of the *Cyperus rotundus* L. plant, a member of the Cyperaceae family. The main producing areas are India, Pakistan, Sri Lanka, and Yunnan and Guangxi provinces in China. Wild resources are declining year by year due to over-harvesting. Artificial cultivation yields 200-300 kg of dried rhizomes per mu (approximately 0.16 acres), with a raw material purchase price of 8-12 yuan/kg, accounting for 55-60% of the ex-factory cost. Processing involves steam distillation for 8-12 hours, yielding only 0.3-0.5% oil. Energy consumption, labor, condensate, and testing account for 25-30% of the total cost. Therefore, a 10% fluctuation in raw material prices can directly translate to approximately 6% in the essential oil price, and the 30-50% premium for wild rhizomes further increases the cost of high-end products.

This report studies the global Nagarmotha Oil production, demand, key manufacturers, and key regions.
