## Abstracts

The global Nail Care market size is expected to reach \$ 5838 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

This report study the Nail Polish product.

Nail polish called 'nail lacquer.' It is mainly composed of 70% -80% of a volatile solvent, about 15% of nitrocellulose, small amounts of solvent oil, camphor, titanium dioxide and oil-soluble pigments. After the nail polish applied to the film formed, with moderate coloration fastness and gloss, to protect the nails, but also gives the nails a beauty.

In recent years, water-based nail polish is becoming more and more popular. This kind of nail polish replaces organic solvent with water. The other main material is acrylic emulsion. When flushed with water after painting nails, water-based nail polish will dry into membrane which is clinging to the nail surface.

### Market Drivers:

**Beauty Awareness and Self-Expression:** Today, nail polish has transcended the realm of mere cosmetics, becoming an important accessory for expressing individuality and adding a touch of fashion. Over 65% of users consider using nail polish as part of their personal style.

**Rising Economic and Social Status of Women:** Globally, increased female labor participation and disposable income have given them greater economic power to invest in personal care and beauty.

Powerful Catalysis of Social Media: Nail art tutorials and trendy designs showcased by beauty bloggers and celebrities on social media platforms can quickly attract tens of millions of followers, directly driving searches and purchases of related products.

The Penetration of the 'Clean Beauty' Trend: Consumers are increasingly concerned about the safety of product ingredients. Data shows that approximately 54% of consumers prefer vegan or cruelty-free nail polish, and nearly 48% of buyers are attracted to clean, non-toxic formulas. This has forced brands to launch '3-free' (free of three harmful substances) or even '10-free' products to meet market demand.

This report studies the global Nail Care production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Nail Care and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
