## Abstracts

The global Nail Clippers for Pet market size is expected to reach \$ 563 million by 2032, rising at a market growth of 5.4% CAGR during the forecast period (2026-2032).

Pet nail clippers are handheld cutting tools designed for routine trimming of claws in dogs, cats, and some small companion animals. Their primary function is to deliver controlled, repeatable cuts through the keratin nail plate to reduce risks associated with overgrown nails, such as abnormal gait loading, snagging and tearing, household scratching injuries, and nail splitting, while improving at-home grooming efficiency. A typical clipper consists of hardened metal blades and a cutting mechanism (commonly scissor-style opposing blades or guillotine-style aperture-and-sliding blade), a hinge or sliding assembly, a return spring, a locking latch, and ergonomic non-slip handles, with optional safety guards/stops or auxiliary lighting to help avoid cutting into the quick. The product is predominantly used in at-home care, while also serving professional grooming salons and veterinary clinics; supply is largely supported by scaled manufacturing in Asia, and demand is fulfilled via standardized SKUs through online retail and pet specialty channels, often bundled with styptic products, files, or grinders.

Supported by rising penetration of at-home pet grooming and resilient spending on pet supplies, 2025 global shipments of pet nail clippers were estimated at approximately 120?220 million units, with mainstream factory (FOB) pricing around US\$0.60?2.20 per unit (dominated by scissor-style and guillotine-style designs, while guard-equipped and higher-spec blade/finishing variants typically sit toward the upper end).

Against the backdrop of pet humanization and the steady rise of at home grooming routines, pet nail clippers are increasingly shifting from professional grooming settings to household use, supported by online retail?s ability to scale standardized SKUs. This

category is therefore showing a dual dynamic of stable volume expansion and structural premiumization around safety and ease of use. In the U.S., APPA reported total pet industry expenditures of US\$152 billion in 2024, with sizable and resilient spending on supplies and services categories that form a durable demand base for routine care tools. This demand foundation is accelerating feature-led upgrades such as ergonomic grips, spring assisted designs, practical safety stops, and visibility aids, which in turn support higher price points and kit based purchasing behavior.

Key risks are concentrated on both ends of the value chain. On the supply side, price driven commoditization raises the bar for consistent blade heat treatment, assembly tolerances, and durability, as quality issues translate quickly into returns and reputational damage. On the demand side, persistent owner anxiety about cutting into the quick and causing bleeding means sales are increasingly influenced by education and usage guidance, not hardware alone, and bundling with styptic solutions and clear instructions can materially improve first time success and repeat purchase. Looking ahead, downstream demand is expected to be shaped by higher trimming frequency at home, growth in multi pet households, and continued SKU standardization and segmentation by species and pet size across e commerce and organized pet retail. Meanwhile, with manufacturing and trade for manicure and pedicure instruments showing clear concentration patterns, brands will need to win through quality control discipline and defensible functional differentiation rather than competing on price alone.

This report studies the global Nail Clippers for Pet production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Nail Clippers for Pet and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Nail Clippers for Pet that contribute to its increasing demand across many markets.

### **Highlights and key features of the study**
