SCOPE OF THE REPORT:

This report focuses on the Nanosilica in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Technological advances in production process is identified to be one of the key trends contributing towards the growth of the nanosilica market. Owing to its strength-initializing factor in concrete mixtures, there is increasing utilization of nanosilica in the construction industry. A new process of silica production from rice husk ash is being adopted due to environmental degradation, depletion of sand, and destruction of aquatic habitats caused by sand mining. RHA is a highly rich siliceous material that can be used in concrete mixtures to harden and strengthen concrete.

The worldwide market for Nanosilica is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
