Abstracts

The global Narrowband IoT Chipset market size is expected to reach $ 42352 million by 2032, rising at a market growth of 38.9% CAGR during the forecast period (2026-2032).

In 2025, global Narrowband IoT Chipset production reached approximately 1,027,500 thousand units, with an average global market price of around USD 4 per unit.

The gross profit margin of major companies was approximately 35%–58%.

Global production capacity was approximately 1,350,000 thousand units in 2025.

A Narrowband IoT Chipset is a low-power cellular semiconductor solution supporting NB-IoT communication over licensed spectrum. It integrates baseband processing, radio-frequency functions, protocol stacks, security, and device-control interfaces for low-data-rate connected equipment. Applications include smart meters, tracking devices, sensors, alarms, and asset monitors. The scope excludes complete IoT modules, LTE-M chipsets, conventional cellular modems, Wi-Fi chips, gateways, connectivity subscriptions, and cloud platforms.

The industrial chain includes upstream wafers, RF components, memory, IP cores, packaging materials, and semiconductor equipment. Midstream covers chip design, wafer fabrication, packaging, testing, firmware development, and certification. Downstream applications include smart metering, logistics, agriculture, industrial monitoring, smart cities, security, healthcare devices, and consumer IoT.

A Narrowband IoT Chipset is a low-power wide-area cellular communication chipset designed for devices that transmit relatively small amounts of data over wide coverage

areas. It usually integrates a modem, radio-frequency components, processors, memory, security functions, and power-management modules and supports licensed-spectrum operation through mobile networks. Major applications include smart meters, environmental sensors, asset tracking, smart parking, street lighting, industrial monitoring, agriculture, and building management. The market is moving toward lower power consumption, smaller form factors, integrated positioning, enhanced security, multi-band support, and combination with LTE-M, satellite IoT, or other communication modes. Growth is driven by smart-city construction, utility digitalization, industrial IoT deployment, and demand for battery-powered devices with long service lives. Wider operator network coverage and standardized cellular connectivity also support adoption. However, competition from LoRaWAN, LTE-M, 5G RedCap, and proprietary technologies, together with module prices, network availability, and certification complexity, may affect market growth.

Report Scope

This report studies the global Narrowband IoT Chipset production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Narrowband IoT Chipset and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Narrowband IoT Chipset that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Narrowband IoT Chipset total production and demand, 2021-2032, (K Units)

Global Narrowband IoT Chipset total production value, 2021-2032, (USD Million)

Global Narrowband IoT Chipset production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Narrowband IoT Chipset consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Narrowband IoT Chipset domestic production, consumption, key domestic manufacturers and share

Global Narrowband IoT Chipset production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Narrowband IoT Chipset production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Narrowband IoT Chipset production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Narrowband IoT Chipset market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Qualcomm Technologies, Inc., MediaTek Inc., Sony Semiconductor Israel Ltd., Sequans Communications S.A., Nordic Semiconductor ASA, u-blox Holding AG, GCT Semiconductor, Inc., Samsung Electronics Co., Ltd., HiSilicon Technologies Co., Ltd., UNISOC Technologies Co., Ltd., etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Narrowband IoT Chipset market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (K Units) and average price (USD/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
