SCOPE OF THE REPORT:

This report focuses on the Nasal Cannula in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The patients who are administered with reusable nasal cannulas are highly vulnerable to risks such as cross-contamination that can eventually lead to hospital-acquired infections. These infections are commonly referred to as nosocomial infections. A huge amount of population are affected by nosocomial infections, which can lead to death. This drives the demand for single-use nasal cannula in various developed countries such as the US, Germany, Japan, and the UK. Single-use nasal cannulas are sterile and trusted devices.
