## Abstracts

According to our (Global Info Research) latest study, the global Natural Aloe Extract market size was valued at US\$ 3172 million in 2025 and is forecast to a readjusted size of US\$ 4466 million by 2032 with a CAGR of 5.0% during review period.

In 2025, global production of natural aloe extract reached 11,250 tons, with an average selling price of US\$274/kg. Natural aloe extract generally refers to an ingredient intermediate derived from aloe vera leaves, extracted/filtered/purified using water/natural or derived natural solvents while retaining the plant's original properties. Downstream applications are concentrated in the food and beverage (functional drinks, aloe vera fruit drinks, yogurt/jelly, etc.), health products (tablets/capsules, powder preparations, gummies, etc.), and daily chemical and personal care (soothing and moisturizing gels, creams, masks, after-sun repair products, oral care, etc.). The upstream of the industry chain is aloe vera cultivation (tropical/subtropical regions, fresh leaves need to be processed as soon as possible after harvesting to inhibit enzymatic degradation and microbial risks), the midstream is primary and deep processing (peeling/crushing for juice extraction ? coarse filtration ? decolorization and purification/membrane filtration ? pasteurization or aseptic stabilization ? concentration or drying ? standardization and batch release), and the downstream is formulation plants and manufacturers. The gross profit margin is approximately 15%–35%.
