Multi-layer Blown Films are co-extruded films which exhibits different properties when blended with different polymer materials. Multi-layer blown films are used for barrier properties. For instance, thermoforming film manufactured by blown extrusion is used for poultry, cheese, and sea foods. Multi-layer blown films includes various applications such as manufacturing bags, pouches, lids and wraps among others. Multi-layer Blown Film are made from extruders where polymer material is passed through a circular die and then followed by bubble expansion. Multi-layer Blown Films provides heat resistance which helps in transition of goods in variable temperatures. Multi-layer blown films also includes stretch films, shrink films & specialty films.

Multi-layer Blown Film has UV stability which makes it more preferable for use. The number of layers in co-extruded films is the crucial factor as it increases the performance of Multi-layer Blown Films.
