Abstracts

The global Natural Benzyl Alcohol market size is expected to reach \$ 13.71 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Natural benzyl alcohol is a colorless, transparent, viscous liquid with a faint, sweet, fruity aroma, belonging to the simplest aromatic alcohols. It is naturally found in essential oils of jasmine, hyacinth, and ylang-ylang, and is also commonly used as a preservative, solvent, or fragrance enhancer in cosmetics, perfumes, and pharmaceutical preparations.

The core upstream raw materials mainly originate from plant extraction and bio-fermentation, physically extracted from essential oils of flowers such as jasmine, ylang-ylang, and hyacinth, or produced by fermenting glucose using engineered microorganisms. The barriers to entry in this stage lie in chiral control and naturalness certification. Downstream, it widely supplies high-end cosmetics, pharmaceutical preservatives, and other fields.

Global sales in 2025 were approximately 4,000 tons, with an average selling price of US\$2,569 per ton. The industry's gross profit margin is between 25% and 30%.

This report studies the global Natural Benzyl Alcohol production, demand, key manufacturers, and key regions.
