Natural hand sanitizer refers to hand sanitizer products made primarily from natural ingredients such as plant extracts and plant oils, with little or no added synthetic chemicals (such as SLS, artificial fragrances, pigments, and preservatives). Its core characteristics are naturally derived and biodegradable ingredients, gentle and non-irritating to the skin, and nourishing and moisturizing effects while cleansing.

The upstream industry mainly includes plant oil (coconut oil, olive oil, sweet almond oil, etc.) planting and processing bases, plant extract suppliers (such as aloe vera, magnolia bark, calendula, etc.), essential oil manufacturers, and environmentally friendly packaging material (biodegradable plastics, glass) companies. The downstream industry encompasses large supermarkets, chain pharmacies, maternity and baby product stores, hotel and catering B2B procurement, and online e-commerce platforms (Tmall, JD.com, live-streaming e-commerce, etc.), reaching end consumers through brand operation, channel distribution, and new retail models. The global average price of natural hand sanitizer is \$3.6 per unit, with annual sales of approximately 3.726 billion units, a global annual production capacity of 4 billion units, and an industry profit margin of 30%.
