Natural plant antifreeze is a kind of plant antifreeze which is non-toxic, harmless and does not pollute the environment. It is a type of plant nutrient solution containing plant hormones and trace elements of cold and frost-resistant plant foliage fertilizer. Its main function is to activate biological enzymes, kill or prevent the formation and reproduction of ice nuclei bacteria, maintain the stability of biofilm structure during cooling, reduce and alleviate the damage of low temperature to the film, reduce the freezing point of plant cells, and enhance plant water retention and resistance. Freezing ability, inhibit and destroy frozen protein, increase heat, reduce freezing ability, and improve plant resistance to low temperature.
