According to our (Global Info Research) latest study, the global Natural Rubber market size was valued at USD 28720 million in 2023 and is forecast to a readjusted size of USD 31310 million by 2030 with a CAGR of 1.2% during review period.

Natural rubber, also called India rubber or caoutchouc, as initially produced, consists of polymers of the organic compound isoprene, with minor impurities of other organic compounds plus water. Natural rubber is the prototype of all elastomers. The rubber is collected from the latex in a series of steps involving preservation, concentration, coagulation, dewatering, drying, cleaning, and blending. Because of its natural derivation, it is sold in a variety of grades based on purity (color and presence of extraneous matter), viscosity, viscosity stability, oxidation resistance, and rate of cure.

Global natural rubber key players include Von Bundit, Sri Trang Agro-Industry, Vietnam Rubber Group, Southland Holding, etc.

China is the largest market, with a share over 35%, followed by Southeast Asia and North America, both have a share over 28 percent.

In terms of product, technically specified rubber (TSR) is the largest segment, with a share over 68%. And in terms of application, the largest application is automotive, followed by industrial.
