Natural Stone Care Products refer to a specialized system of chemical maintenance solutions engineered specifically for the preservation of natural mineral surfaces, including marble, granite, travertine, slate, and limestone. These products are generally categorized into Cleaners, Sealers, and Polishers. Unlike generic household detergents, professional stone care formulations are typically pH-neutral to prevent chemical etching or dulling of the stone's delicate mineral structure (such as calcium carbonate). The primary function of these products is to create a molecular barrier through penetrative technology, effectively repelling water, oil, and stains while sealing microscopic pores to maintain the stone's natural luster, breathability, and structural integrity.
