Natural Thaumatin is a high-intensity sweetener that is derived from the fruit of the katemfe plant (*Thaumatococcus daniellii*). It is a protein - based sweetener, consisting of a mixture of several closely - related proteins. Thaumatin is intensely sweet, with a sweetness potency that is several thousand times greater than that of sucrose. It has a unique taste profile that is not only sweet but also has a licorice - like or sugary aftertaste. This natural sweetener is heat - stable over a certain range of temperatures, making it suitable for some food and beverage applications where heat processing is involved. It is also water - soluble, which allows it to be easily incorporated into aqueous - based products such as soft drinks and fruit juices. The extraction of natural Thaumatin involves processes that separate and purify the sweet - tasting proteins from the plant material to obtain a concentrated and usable form of the sweetener.
