According to our (Global Info Research) latest study, the global NB Latex market size was valued at US\$ 3363 million in 2025 and is forecast to a readjusted size of US\$ 4588 million by 2032 with a CAGR of 4.6% during review period.

NB latex is a synthetic latex which has a milky color and a liquid form and is used for dipping rubber for medical and laboratory gloves, etc. thanks to its excellent tensile strength, oil resistance, etc.

There has been a growing trend of switching from natural rubber latex (NRL) to NB Latex due to concerns about latex allergies. NB Latex is hypoallergenic, making it a safer alternative, particularly in healthcare environments. One of the most significant drivers for NB Latex is the rising global demand for nitrile gloves. The need for disposable gloves has surged due to the increasing awareness of hygiene and safety, accelerated by events such as the COVID-19 pandemic.

NB latex demand has close relationship with nitrile gloves manufacturing distribution as more than 80% sales went into the nitrile gloves industry. There is no doubt that Southeast Asia becomes the largest consumer of NB latex globally. More than 75% NB latex are transported to the region each year. Besides the region, China also attracts more attention.
