Abstracts

The global Neodecanoic Acid market size is expected to reach \$ 744 million by 2032, rising at a market growth of 6.0% CAGR during the forecast period (2026-2032).

Neodecanoic acid, also known as tertiary decanoic acid, tertiary carbonate 10, 2-ethyl-2,5-dimethylhexanoic acid, has a molecular formula of C₁₀H₂₀O₂ and appears as a water white liquid at room temperature. Neodecanoic acid is a synthesized tertiary carboxylic acid containing 10 carbon atoms, with a highly branched structure.

Neodecanoic acid has excellent hydrolytic stability, thermal stability, and chemical reagent stability, mainly due to the steric hindrance effect generated by its highly branched tertiary carbon structure and the tertiary carbon characteristics of the alpha carbon atom itself. Compared with primary and secondary carbonic acids with the same number of carbon atoms, these characteristics are particularly prominent. Neodecanoic acid is a key intermediate for producing high-performance materials. In 2025, global Neodecanoic Acid production reached approximately 129 K MT, with an average global market price of around US\$ 3,731 per MT.

The demand for neodecanoic acid is mainly increasing with the upgrading of high-performance coatings and industrial lubricants, especially under high temperature, high humidity, and long service life conditions. Customers value the comprehensive cost advantages brought by the solubility of metal salts derived from neodecanoic acid, the stability of drying efficiency, and the low-temperature flow and oxidation stability of synthetic esters. The competition focus is shifting from simple price to low odor, low color, low impurities and batch consistency, as well as the formula application support and compliance document delivery capabilities around neodecanoic acid salts and neodecanoic acid esters. At the same time, its price and supply fluctuations are often greatly affected by changes in upstream olefin raw materials and synthesis route costs, environmental protection and safety management requirements.

This report studies the global Neodecanoic Acid production, demand, key

manufacturers, and key regions.
