Neon gas recovery is the process of extracting neon (Ne), a noble gas that is colorless, inert, and found in trace amounts in the Earth's atmosphere (about 0.0018% by volume). Neon is primarily used in lighting (like neon signs), high-voltage indicators, and various other applications, including lasers and cryogenics. As demand for neon increases, particularly for its application in semiconductor manufacturing and other high-tech industries, efficient recovery methods have become more critical.
