According to our (Global Info Research) latest study, the global Network Detection And Response (NDR) Software market size was valued at USD 2074.5 million in 2023 and is forecast to a readjusted size of USD 4521 million by 2030 with a CAGR of 11.8% during review period.

NDR solutions primarily use non-signature-based techniques (for example, machine learning or other analytical techniques) to detect suspicious traffic on enterprise networks. NDR tools continuously analyze raw traffic and/or flow records (for example, NetFlow) to build models that reflect normal network behavior. When the NDR tools detect suspicious traffic patterns, they raise alerts. In addition to monitoring north/south traffic that crosses the enterprise perimeter, NDR solutions can also monitor east/west communications by analyzing traffic from strategically placed network sensors.
