Abstracts

The global Network Detection And Response (NDR) Software market size is expected to reach $ 4521 million by 2029, rising at a market growth of 11.8% CAGR during the forecast period (2023-2029).

Global network detection and response (NDR) software key players include Palo Alto Networks, Vectra AI, ExtraHop, Cisco, etc. The largest player is ExtraHop, with a share of about 7%. The Americas has the largest consumption market, with a share of more than 55%. In terms of its product category, cloud-based occupies the main market, with a share of more than 80%. In terms of its application, 65% of the market share is used for large enterprises, while SMEs account for a relatively low share.

NDR solutions primarily use non-signature-based techniques (for example, machine learning or other analytical techniques) to detect suspicious traffic on enterprise networks. NDR tools continuously analyze raw traffic and/or flow records (for example, NetFlow) to build models that reflect normal network behavior. When the NDR tools detect suspicious traffic patterns, they raise alerts. In addition to monitoring north/south traffic that crosses the enterprise perimeter, NDR solutions can also monitor east/west communications by analyzing traffic from strategically placed network sensors.
