The global Network Pulse Electric Fence market size is expected to reach \$ 563 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

Network Pulse Electric Fence is an intelligent perimeter security system based on pulse high voltage technology. It consists of a pulse generator (host) and a front fence. It forms a tangible barrier by periodically releasing high voltage pulses. It has the functions of blocking, deterrence and alarm. The pulse energy is low, the duration is short, and it does not cause fatal harm to the human body. It can adapt to complex terrain and all-weather environments. It is suitable for military bases, substations, airports, prisons and other places with high security requirements.

This report studies the global Network Pulse Electric Fence production, demand, key manufacturers, and key regions.
