## Abstracts

According to our (Global Info Research) latest study, the global Neutral Alternative Protein market size was valued at USD 6031.2 million in 2023 and is forecast to a readjusted size of USD 9318.3 million by 2030 with a CAGR of 6.4% during review period.

Alternative proteins, such as plant-based meat substitutes and edible insects, provide a substantial amount of protein but require less natural inputs to produce than the most common protein sources, meat and fish. Composed of different sequences of amino acids, proteins are found in almost all whole foods. Protein is responsible for building lean body tissue and providing the elements needed for digestive enzymes. Certain plant-based proteins offer functionality but pose flavor challenges. Pea protein is becoming more popular in part because of its neutral flavor.

Global Neutral Alternative Protein key players include Kerry, Cargill, Archer Daniels Midland, Glanbia, CHS etc. Global top five manufacturers hold a share over 30%.

North America is the largest market, with a share over 35%, followed by Europe and Asia-Pacific, both have a share over 40% percent.

In terms of product, Plant Protein is the largest segment, with a share over 50%. And in terms of application, the largest application is Food & Beverage followed by Healthcare Product.
