According to our (Global Info Research) latest study, the global Naphthenic Base Oil market size was valued at USD 548.3 million in 2023 and is forecast to a readjusted size of USD 790.2 million by 2030 with a CAGR of 5.4% during review period.

Naphthenic base oil is hydro-treated group V base oil obtained through distillation of sweet crude. They possess low pour point, low wax content, and excellent swell properties. Naphthenic base oils also provide better low-temperature performance than paraffinic oils, which makes them ideal for formulating hydraulic fluids and automatic transmission fluids. Naphthenic oils respond well to antioxidants and additives due to high solvency power.

The global naphthenic base oil market is rising moderately in the recent years and going forward it is likely to progress this way. The growth of the naphthenic base oil market is primarily attributed to the favorable physical properties of naphthenic base oil that makes it ideal for several formulations such as for gear oil, process oil, plasticizers, adhesives & sealants, and oil expender polymers. These end products are further used in various end-use industries such as automotive and industrial applications.
