## Abstracts

The global Neutron Detectors market size is expected to reach $ 242.6 million by 2029, rising at a market growth of 7.7% CAGR during the forecast period (2023-2029).

The global top three neutron detector manufacturers include Photonis, Arktis Radiation Detectors, Thermo-Fisher Scientific, with a total market share of more than 45%, of which the largest manufacturer is Photonis, with a market share of more than 20%. The Americas is the global leading consumer market for neutron detectors, with a market share of over 35%. In terms of type, gas proportional detectors have a market share of over 84%. In the application field, the market share of the homeland security field accounts for more than 60%.

Neutron detectors consist of materials that interact with neutrons. Although the principle reaction mechanisms of neutrons with matter are limited, the options for detection media are quite numerous. Detectors can consist of solid, liquid, or gas-filled media. Beside the detection mechanism, there is one major challenge for all types of neutron detectors. They all need to be insensible to gamma ray emission or at least require an implemented technique to discriminate between neutron and background gamma ray events, as neutron detection often takes place in a mixed radiation field.

This report studies the global Neutron Detectors production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Neutron Detectors, and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Neutron Detectors that contribute to
