The full name of the neutron knife is the automatic remote control afterloading treatment system of californium 252 neutron source. The neutron knife is a radiotherapy device. It is a large-scale modern radiotherapy tumor treatment device that integrates multiple disciplines such as nuclear physics, radiobiology, automatic control, and computers. The neutron knife uses the californium-252 neutron source as a radiation source. Through remote control, the neutron source is automatically guided and delivered to the tumor site through a special source applicator. According to the treatment plan accurately planned in advance by the treatment plan system, the tumor tissue is locally irradiated to achieve the purpose of killing the tumor tissue to the greatest extent and protecting normal tissue.
