Abstracts

NGS is a technology in which millions and billions of DNA strands can be sequenced through massive parallelization. This technique is also known as high throughput sequencing.

SCOPE OF THE REPORT:

This report studies the Next Generation Sequencing (NGS) market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Next Generation Sequencing (NGS) market by product type and applications/end industries. The impact of the driving factors is expected to overcome the effect of restraints. Moreover, the utilization of cloud computing in NGS for data management and untapped emerging economies are expected to provide new market opportunities to NGS manufacturers in the near future.

North America is estimated to command the largest share of the next-generation sequencing market in 2017, followed by Europe and Asia-Pacific. Emerging markets, like China, India, and Brazil are expected to offer significant growth opportunities owing to the improving healthcare infrastructure, government funding for translational research, and rising partnerships & agreements among market players.

In addition, these countries have less-stringent regulations and data requirements as compared to developed nations; companies find regulatory policies in the Asia-Pacific region to be adaptive and business-friendly. Moreover, increasing competition in mature markets will intensify the focus on emerging markets.

The global Next Generation Sequencing (NGS) market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR

of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Next Generation Sequencing (NGS).
