According to our (Global Info Research) latest study, the global Next Generation Storage Devices market size was valued at USD 74490 million in 2023 and is forecast to a readjusted size of USD 145600 million by 2030 with a CAGR of 10.0% during review period.

The nextgeneration storage device integrates distributed storage technology, uses standardized hardware facilities to construct storage pools, virtualizes existing storage facilities, interconnects and breaks data scheduling barriers, and provides object, block, and file storage services under a unified system. And has the advantages of high reliability and easy management.

DAS is the oldest storage system and offers convenient data storage solution. DAS offers simplicity and low-cost solution compared to any other storages. Network-attached storage (NAS) is the second-largest market by size after DAS in the next-generation data storage market. The key feature of NAS is the ability to provide multiple-client access to the same file. NAS devices also offer vertical and horizontal scalability. Such solutions are mostly used by enterprises where data security is of prime importance.
