## Abstracts

The global NFC Business Card market size is expected to reach \$ 43.54 million by 2032, rising at a market growth of 9.7% CAGR during the forecast period (2026-2032).

Embedded with an NFC chip, your Business Card will trigger a digital Action (like opening your website) when tapped against any NFC enabled device ? these days, that?s most Private Order and Company Order. NFC is a lot like RFID, only it's a more up-close-and-personal type of wireless. Whereas RFID can be used from a distance, NFC readers work at a maximum range of about 4 inches (10 centimeters). NFC readers aren't suitable for RFID-style inventory tracking; their range is too short. So, NFC Business Card can meet the needs of security and convenience.
