Abstracts

The global Niobium Oxide Capacitors market size is expected to reach \$ 10700 million by 2032, rising at a market growth of 3.5% CAGR during the forecast period (2026-2032).

A niobium oxide capacitor contains a layer of Nb₂O₅ which is formed around NbO (niobium monoxide) grains as the dielectric. Niobium oxide capacitors have stable capacitance, leakage current and ESR parameters over time. This means functionality and performance both remain reliable and consistent. They also do not exhibit any piezo effect and have no voltage dependence, thus making them a good fit in coupling circuits.

Global Niobium Oxide Capacitors key players include AVX, Vishay, etc. Global top two manufacturers hold a share over 90%.

Japan is the largest market, with a share about 70%, followed by USA, with a share over 25 percent.

In terms of product, High CV is the largest segment, with a share nearly 45%. And in terms of application, the largest application is Consumer electronic, followed by Automotive, Industrial, Power supply, etc.
