Abstracts

The global Niobium market size is expected to reach \$ 5334 million by 2032, rising at a market growth of 6.3% CAGR during the forecast period (2026-2032).

Niobium is a silver-grey, metallically lustrous rare metal element with the chemical symbol Nb and atomic number 41. It has good ductility, high melting point (about 2477°C) and corrosion resistance, and can remain stable in a variety of harsh environments. Niobium is mainly used to produce high-strength low-alloy steel, superconducting materials and high-temperature resistant alloys, and is widely used in aerospace, nuclear industry, electronic equipment and medicine. In addition, niobium oxide also has important applications in optics and catalysis.

In terms of product types, niobium includes ferroniobium, niobium oxide and niobium metal. Ferroniobium is widely used as an additive in the steel industry. It can significantly improve the strength and toughness of steel. It is an indispensable metal in modern industry. Its main consumption areas are North America, Europe, China, Japan, India, South Korea, etc. In countries and regions with heavy industrial development systems such as steel, the market size will be US\$2,832.65 million in 2024, accounting for about 88.38% of the world. It is expected to reach US\$4,013.77 million in 2031, and the global share will drop to 81.23%; Niobium oxide has excellent Due to its chemical stability and high refractive index, niobium is widely used in the fields of electronics, optics and ceramics; niobium metal has a high melting point, low density, good corrosion resistance and excellent mechanical properties, and is widely used in the fields of aerospace, energy, electronics and chemical industry. Widely used. Niobium oxide and niobium metal are increasingly occupying a larger share in the world due to their excellent properties and important application value. For example, CBMM has developed battery-grade niobium oxide in recent years for use as battery cathode

materials. With the development of electric vehicles, niobium oxide will have a broad application market in the future. Currently, the world's major manufacturers include CBMM, CMOC Group and Niobec. Relying on rich niobium ore resources and cutting-edge niobium product technology, the leading manufacturer CBMM share will reach 77.35% in 2024, and the niobium industry is highly concentrated.
