## Abstracts

The global Nitrogen Fire Extinguishing Fire Truck market size is expected to reach \$ 45 million by 2029, rising at a market growth of 5.0% CAGR during the forecast period (2023-2029).

The fire extinguishing method and equipment of the fire truck of the nitrogen generating unit, through the nitrogen preparation vehicle of the mobile nitrogen generating unit and the equipment fixed or connected on the multi-functional combat fire truck, nitrogen is prepared by the former equipment, and the nitrogen is input into the latter. In the nitrogen storage tank, the latter is equipped with a nitrogen storage tank and a water storage tank. The nitrogen storage tank is connected to each branch air pipe, the water storage tank is connected to the pump group, and the pump group is connected to each branch water pipe, and the water pipe and the air pipe are respectively connected to the pulse air pressure. Spray water guns, two-phase water mist fire extinguishing guns, pulse water cannons, fire airships, fire hot air balloons, fire rotor drones, and fire helicopters. This product uses nitrogen as a fire extinguishing agent, and uses the nitrogen preparation device fixed on the fire truck as the source of nitrogen to extinguish the fire with nitrogen at the fire site, without polluting the surrounding environment and causing secondary disasters. This product has the realization. The multifunctional large-scale three-dimensional fire fighting capability is suitable for large-scale fire scenes.
