The global Nitrogen Gas Springs market size is expected to reach \$ 978 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Nitrogen gas spring is a new type of spring component by using high pressure Nitrogen as its medium. It features small size, great elastic force, long stroke, stable performance, precision manufacturing, long service life (1,000,000 times), gently curve diagram for elastic force, no need retightening etc. Using Nitrogen gas spring component can simplify molds design, manufacturing, installation as well as its adjustment. Using that type of spring can extend mold's service life and ensure stable quality. Nitrogen gas spring not only can be used as separate component to be installed into molds, but also to be designed to Nitrogen gas spring system, then act as part of mold to accomplish stable function of elastic force and retardation action, it is new generation type of ideal elastic component with flexible functions.

From the perspective of output, the main global nitrogen spring manufacturers are concentrated in Europe, the United States and Japan. With the vigorous promotion of the domestic economic industrial upgrading policy, customers have put forward more quality requirements and higher technical indicators for nitrogen springs, and the specifications and functions are becoming more and more diverse. Nitrogen spring companies should actively improve product quality to make their products attractive in the market. From the perspective of product type and technology, the nitrogen spring market product types mainly include standard, compact, super compact and micro. In terms of total volume, the standard type of the global nitrogen spring market accounts for 60% of the total market. From the perspective of product market application, the nitrogen spring market is divided into automobiles, electronics and others. Automobiles occupy about 50% of the global market. In recent years, nitrogen springs have not only

been widely used in the automotive mold industry, but are also being continuously applied to other industrial fields, such as electronics, instrumentation and other industries. The main nitrogen spring manufacturers on the market include DADCO, Barnes Group, Misumi, Special Springs, Shaoyang Xingda, etc. The top five companies in the world account for about 36% of the market. The overall market concentration is high, and most of the high-end market is monopolized by foreign companies.
