Nitrogen making package is an essential equipment in many industries, which can produce 99% pure nitrogen. In the oil and gas industry, nitrogen is used in gaseous form to reduce the risk of fire and explosion and prevent oxidation. It can be used for nitrogen layer in storage tank, flushing of pipeline and storage tank, gas sealing, cooling flare device and flushing instrument panel. With membrane system and PSA system, the purity of the two nitrogen production systems is different, and nitrogen production packages of different specifications are selected according to different working environment.
