Non-Corrugated Collapsible Boxes are foldable packaging boxes made from paperboard, plastic sheet, or other flat materials without corrugated fluting. They are used for retail packaging, lightweight storage, display packaging, and logistics applications requiring easy folding, compact transport, and moderate protection.

The industrial chain includes upstream paperboard, plastic sheets, coatings, inks, adhesives, and cutting materials. Midstream covers printing, die cutting, creasing, folding, gluing, and packaging. Downstream applications mainly include consumer goods, cosmetics, electronics accessories, food packaging, retail display, and e-commerce packaging.

Logistics packaging lightweight and green consumption trends drive the application of non-corrugated collapsible boxes. Featuring foldable storage, high structural strength and repeated circulation, they reduce packaging costs and save storage space.

Environmental material upgrading and structural optimization further improve loading and protection performance.
