According to our (Global Info Research) latest study, the global Non-curing Waterproof Coating market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Non-curing waterproof coating refers to a type of coating that does not harden or cure after application. Unlike traditional coatings that dry or cure to form a solid film, non-curing waterproof coatings remain in a liquid or semi-liquid state, providing a continuous barrier against water penetration. These coatings are typically made from a blend of water-resistant polymers, resins, and additives. They are applied to surfaces such as concrete, masonry, metal, or wood to prevent water from seeping through and causing damage. Non-curing waterproof coatings can be used in various applications, including roofs, basements, foundations, tunnels, and swimming pools.
