Non-dairy fat refers to a type of fat that is derived from sources other than dairy products such as milk, butter, cheese, and cream. Some common sources of non-dairy fats include plant-based oils like olive oil, coconut oil, and avocado oil, as well as nut butters and seeds like peanut butter and sesame seeds. Non-dairy fats are often used as a substitute for dairy fats in cooking and baking, especially for people who are lactose intolerant or have a dairy allergy. They can also be a healthier option since many non-dairy fats are high in healthy unsaturated fats, while dairy fats tend to be high in saturated fats.
