## Abstracts

The global Non-Expanding Mat market size is expected to reach \$ 186 million by 2032, rising at a market growth of 8.6% CAGR during the forecast period (2026-2032).

In 2025, global non-expanding mat production reached approximately 7795 k units, the average price is 13 usd/unit. Non-expanding mats are inorganic gaskets primarily made of polycrystalline alumina fibers or modified ceramic fibers. They do not contain components such as vermiculite that expand when heated; instead, they rely on the material's inherent physical elasticity, resilience, and high friction to provide uniform support, sealing, heat insulation, and vibration damping for the ceramic carrier in automotive exhaust purification systems.

The gross profit margin for non-expandable mat is around 28%.

This report studies the global Non-Expanding Mat production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Non-Expanding Mat and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
