Abstracts

The global Non-Food and Non-Beverages Metal Cans market size is expected to reach \$ 8350 million by 2032, rising at a market growth of 4.0% CAGR during the forecast period (2026-2032).

The Non-food and Non-beverage Metal Cans market covers rigid steel/tinplate and aluminum containers used for personal care, household products, paints, chemicals, automotive products, pharmaceuticals and specialty consumer goods.

Cans in this report referred to the cans that were not used for contain food or beverages.

Market Drivers

1. Recyclability and circular-packaging regulation

Steel and aluminum can be collected, separated and recycled through established metal-recycling systems. The EU Packaging and Packaging Waste Regulation requires packaging to be designed for recyclability and targets economically viable recyclability by 2030, improving the relative positioning of mono-material metal packaging.

2. Growth in personal-care aerosols

Deodorants, antiperspirants, hair sprays, shaving foams, dry shampoos, sun-care products and body sprays benefit from controlled dispensing, hygiene and portability. Personal care and household care together represented more than three-quarters of European aerosol production, illustrating their central role in aerosol-can demand.

3. Convenience and controlled dispensing

Aerosol systems provide consistent dosing, fine spray, foam or gel dispensing, limited product contact and easy one-handed use. These characteristics are difficult to duplicate with conventional open cans or jars.

This report studies the global Non-Food and Non-Beverages Metal Cans production, demand, key manufacturers, and key regions.
