Abstracts

According to our (Global Info Research) latest study, the global Non-hardening Valve Sealant market size was valued at US\$ 211 million in 2024 and is forecast to a readjusted size of USD 273 million by 2031 with a CAGR of 3.8% during review period.

Valve Sealants support the in-field sealing of gate valves with moderate to severe damage. Gate valves leak when there is damage across the sealing surfaces of the gate or seats, in the form of galling, scoring or cutting. Boasting full resistance to produced fluids and gases and excellent lubricity, Non-hardening sealants will ensure the valve will still operate even under high differential pressure.
