The global Non-Metallic Stair Profile market size is expected to reach $ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Stair profile refers to a strip of material located at the front of the stairs, usually used to protect the edge of the front of the stairs, but also to provide anti-slip and visual guidance. Non-metal stair rails are usually made of wood, rubber or plastic materials, which are wear-resistant, non-slip, and easy to clean, which can effectively prolong the service life of the stairs. In addition, the stair profile can also enhance the aesthetics of the staircase through design such as color and texture.
