According to our (Global Info Research) latest study, the global Non-Pneumatic Tires market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Non-Pneumatic tires (NPT), are tires that are not supported by air pressure. They are used on some small vehicles such as riding lawn mowers and motorized golf carts. They are also used on heavy equipment such as backhoes, which are required to operate on sites such as building demolition, where risk of tire punctures is high. Tires composed of closed-cell polyurethane foam are also made for bicycles and wheelchairs.

In 2022, global tire sales reached 1.749 billion units, of which the three major markets of Europe, North America and China will collectively sell 1.14 billion units, accounting for 65% of the total. China is the world's largest tire producer and exporter. Among the top 75 tire companies in 2022 released by Tire Business, 34 are Chinese companies (including 5 from Taiwan), with a total sale of approximately US\$ 34.5 billion, accounting for approximately 19.42% of the total global sales. According to data from the National Bureau of Statistics, by the end of December 2022, the output of rubber tire casings in China was about 856 million. According to the data of the General Administration of Customs, in 2022, the cumulative export volume of rubber tires in China was 7.65 million tons, a year-on-year increase of 4.7%; the export value was ?131.418 billion, an increase of 16%; the trade surplus was 103.709 billion yuan, an increase of ?15.89 billion.
