In 2024, global Non-reconstituted Fruit Juice production reached approximately 84,228 tons, with an average global market price of around US\$ 1,635 per ton. Gross margin is about 53%. The cost is 768 usd. Production Capacity is about 120,000 tons. Non-reconstituted Fruit Juice is the short version of Not From Concentrate. It is produced by fruit juice extraction, sterilization and filling, without the concentration or reduction process. So NFC juice preserves more nutrition and flavors than traditional drinks. The upstream and downstream segments of NFC Fruit Juice's industrial chain may be summarised as follows: upstream comprises raw juice ingredient supply, encompassing fruit growers, orchards and fruit wholesalers providing fresh fruit materials, alongside agricultural inputs such as fertiliser and pesticide provision; Midstream encompasses production and processing stages, including juice extraction, cold chain transportation, pasteurisation, and bottling facilities, ensuring product quality and safety; downstream involves sales and distribution channels, such as supermarkets, convenience stores, e-commerce platforms, food service chains, and export trade, delivering finished juice to end consumers alongside brand marketing and after-sales services. The entire supply chain relies on the freshness of raw materials, processing technology, and the efficient operation of distribution channels.

1. Market Growth and Consumer Demand: The global market for non-reconstituted fruit juice is expected to continue growing, driven by increasing consumer preference for natural, minimally processed beverages. Health-conscious consumers are willing to pay

a premium for products perceived as fresh, high-quality, and free from additives, supporting market expansion in developed and emerging regions.

2. **Technological Innovation and Processing:** Advancements in cold-pressing, high-pressure processing (HPP), aseptic packaging, and shelf-life extension technologies are enabling producers to maintain flavor, nutrients, and freshness without relying on concentrates. Innovative packaging, including sustainable and convenient formats, will further enhance consumer appeal.

3. **Sustainability and Supply Chain Optimization:** Sustainability trends are driving the use of eco-friendly packaging, waste reduction, and local sourcing of fruits. Companies are increasingly integrating traceability, digital monitoring, and optimized logistics to ensure product quality, reduce environmental impact, and meet regulatory and consumer expectations.
