According to our (Global Info Research) latest study, the global Non-Slip Additives market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

No-Slip Additive is an easy to use powder additive which can be mixed into floor coatings to provide an non-slip finish. No-Slip Additive will help improve the grip on a painted surface when it becomes wet thereby providing a safe non-slip surface.

APAC was the largest market for no-slip additives in 2017 and is projected to lead the global no-slip additives market during the forecast period. The APAC no-slip additives market is driven mainly by the presence of the world's busiest ports in countries such as China, Singapore, and Hong Kong. Increasing trade activities and rising infrastructural developments in the shipping industry (in the form of growing network of ports) are primarily responsible for the high demand for no-slip additives in the region. The dominance of APAC is also due to the relaxed freight tax norms by the governments of India and China. Moreover, increasing strategic expansion activities by manufacturing companies in the region are also driving the no-slip additives market.

The Global Info Research report includes an overview of the development of the Non-Slip Additives industry chain, the market status of Construction Flooring (Aluminum Oxide, Silica), Marine Deck (Aluminum Oxide, Silica), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Non-Slip Additives.
