Abstracts

The global Non Sparking Safety Hand Tools market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The term 'non-sparking tools' refers to items that help prevent the occurrence of explosions and fires while working in so-called ATEX zones (acronym for ATmosphere EXplosives). These tools consist of brass, bronze, copper-nickel, copper-aluminum or copper-beryllium alloys (beryllium bronze). These utensils are produced through specific processes to reduce the risk of spark generation. Extreme caution in the management of workers' health and workplace conditions, especially in industries with a high risk of explosion or fire, is one of the most important factors in reducing accidents.
