Global Non-Surgical Spinal Decompression and Powered Traction Systems Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

https://marketpublishers.com/r/G6F37F2C2911EN.html
Date: November 2026
Pages: 225
Price: US$ 3,480.00 (Single User License)
ID: G6F37F2C2911EN

Abstracts

According to our (Global Info Research) latest study, the global Non-Surgical Spinal Decompression and Powered Traction Systems market size was valued at US$ 289 million in 2025 and is forecast to a readjusted size of US$ 444 million by 2032 with a CAGR of 6.2% during review period.

Non-Surgical Spinal Decompression and Powered Traction Systems are professional rehabilitation and physical therapy devices designed to apply controlled mechanical traction or decompression forces to the cervical or lumbar spine. The systems typically integrate an electrically driven traction mechanism, programmable control unit, patient positioning and fixation components, and either an integrated treatment platform or a compatible traction table. Depending on system configuration, equipment can deliver axial traction, intermittent or cyclic loading, progressive force profiles, automatic force compensation, and, in selected advanced models, multi-axis movement, angular positioning, dynamic feedback and computerized treatment management. Major product forms include integrated table systems, standalone traction units and seated traction systems, while clinical configurations may be designed for lumbar, cervical or combined cervical-lumbar treatment. These systems are primarily deployed in hospital rehabilitation departments, rehabilitation hospitals, spine specialty clinics, chiropractic clinics and physiotherapy centers for non-surgical management and rehabilitation of selected spinal disorders.

Key Findings

+357 96 030922
info@marketpublishers.com

Global sales were approximately 31.6 thousand units in 2025 and are estimated at about 33.1 thousand units in 2026

Global production was approximately 32.4 thousand units in 2025 and is estimated at about 34.0 thousand units in 2026

The global weighted average selling price increased from about US$8,900 per unit in 2025 to about US$9,060 per unit in 2026

Standard powered traction systems account for the majority of unit shipments, while integrated decompression systems contribute disproportionately to market value

The industry combines specialized spinal decompression manufacturers with diversified rehabilitation equipment OEMs across North America, Europe and Asia

Market Trends

The Non-Surgical Spinal Decompression and Powered Traction Systems industry is moving from conventional force-controlled traction toward more integrated, digitally controlled and patient-specific treatment platforms. Product development is increasingly focused on automatic force compensation, programmable loading curves, multi-axis positioning, treatment-angle adjustment, dynamic feedback and digital patient management. Advanced systems are also incorporating more precise targeting of cervical and lumbar segments and broader combinations of traction, flexion, rotation and lateral movement. At the same time, the market remains structurally divided between higher-value integrated decompression platforms and more standardized powered traction units, allowing hospitals and clinics to select configurations according to treatment intensity, budget and existing rehabilitation infrastructure. Product upgrading is therefore occurring through improved control accuracy and clinical workflow rather than through a complete replacement of conventional powered traction technology.

Market Dynamics

Drivers

Growth in Non-Surgical Spinal Decompression and Powered Traction Systems is

+357 96 030922
info@marketpublishers.com

supported by the expansion of rehabilitation medicine, increasing treatment volumes for degenerative spinal conditions and persistent neck and lower-back disorders, and continued investment in outpatient rehabilitation capacity. An aging population and rising demand for conservative treatment are expanding the addressable patient base, while hospitals and rehabilitation institutions are replacing conventional mechanical traction equipment with electrically driven systems offering more precise force control and better repeatability. In China and other Asian markets, rehabilitation department construction and equipment upgrading remain important sources of incremental demand, while North America continues to benefit from a large network of chiropractic, spine and physical therapy clinics.

Restraints

Market expansion is constrained by significant differences in clinical practice, reimbursement conditions and physician acceptance of traction-based therapies. Evidence and guideline support vary by indication, limiting the use of spinal traction as a routine treatment for all forms of back pain. High-end decompression systems can also require substantially higher capital expenditure than conventional traction equipment, making purchasing decisions sensitive to utilization rates and reimbursement economics. In addition, long equipment replacement cycles reduce recurring demand in mature hospital markets, while lower-priced Asian systems place continued pressure on the average pricing of standard powered traction products.

Opportunities

The main opportunities lie in upgrading installed conventional traction equipment to systems with programmable force control, automatic compensation, multi-axis movement and digital treatment management. Rehabilitation hospitals, hospital rehabilitation departments and specialized spine clinics in emerging markets remain underpenetrated relative to mature healthcare systems. Manufacturers can also capture higher value through modular configurations that allow institutions to add cervical, lumbar or advanced positioning capabilities without replacing an entire treatment platform. Multi-axis systems and intelligent decompression platforms represent a particularly attractive premium segment where technical differentiation is stronger and direct price competition is less intense.

Challenges

+357 96 030922
info@marketpublishers.com

The industry faces continuing challenges in clinical standardization, product differentiation and demonstrating measurable treatment outcomes across heterogeneous patient groups. Product terminology is not fully standardized globally, with spinal decompression systems, powered traction units and multi-dimensional traction systems sometimes marketed under overlapping descriptions. This complicates purchasing comparisons and increases the importance of regulatory registration, clinical positioning and distributor education. Manufacturers must also balance increasingly sophisticated control and positioning functions against equipment reliability, service requirements and total ownership cost, particularly in markets where rehabilitation equipment budgets remain constrained.

Industry Chain Analysis

The upstream supply chain of Non-Surgical Spinal Decompression and Powered Traction Systems consists primarily of electric actuators, motors, reduction mechanisms, force and position sensors, controllers, embedded electronics, displays, steel and aluminum structural components, treatment-table frames, cushioning materials, fixation belts and other medical-grade mechanical components. More advanced multi-axis systems require additional motion-control assemblies, precision transmission components, feedback sensors and software control modules. Because the equipment is produced in relatively small volumes compared with mass-market medical devices, mechanical integration, safety design, software control and regulatory compliance generally contribute more to product differentiation than raw material costs alone.

The midstream comprises specialized spinal decompression manufacturers and diversified rehabilitation equipment OEMs responsible for system design, final assembly, calibration, medical-device registration, quality control and after-sales service. Downstream value is generated through hospitals, rehabilitation hospitals, spine specialty clinics, chiropractic clinics and physiotherapy centers. Higher-end manufacturers capture additional value through integrated treatment platforms, proprietary control algorithms, multi-axis motion, clinical protocols and service networks, whereas standardized powered traction units compete more heavily on manufacturing cost, reliability and distributor coverage.

Segment Insights

By product type, standalone powered traction units account for the largest share of

+357 96 030922
info@marketpublishers.com

global unit shipments because they offer relatively low acquisition costs, compatibility with existing treatment tables and broad use across hospital rehabilitation and physiotherapy settings. Integrated table systems represent a smaller portion of shipments but a considerably higher share of market value because they combine the traction drive, treatment platform, control system and patient-positioning structure in a single solution. Seated traction systems remain a more specialized category and are concentrated in selected outpatient and chiropractic applications.

From a technology perspective, axial traction remains the mainstream configuration, while multi-axis traction systems represent the more differentiated direction of product development. Multi-axis systems can add controlled flexion, extension, lateral movement, rotation or angular positioning to conventional longitudinal traction, increasing equipment complexity and average selling prices. By treatment region, combined cervical-lumbar systems have strong commercial appeal because a single platform can support multiple treatment protocols, while dedicated cervical or lumbar systems continue to serve institutions seeking more specialized configurations.

Downstream Market Opportunities

Hospital rehabilitation departments and rehabilitation hospitals represent the most stable institutional demand base because spinal traction can be incorporated into broader musculoskeletal and neurological rehabilitation programs. In North America, chiropractic and spine specialty clinics provide an important market for higher-value decompression systems, where equipment can support differentiated non-surgical treatment services. Physiotherapy centers offer additional opportunities for compact or modular powered traction systems, particularly when the equipment can be integrated with existing treatment tables. Future downstream growth is expected to be strongest where rehabilitation capacity is expanding and institutions are replacing basic traction equipment with digitally controlled systems.

Regional Insights

North America remains a major high-value market for Non-Surgical Spinal Decompression and Powered Traction Systems, supported by an established network of chiropractic clinics, spine centers and physical therapy providers and by relatively strong penetration of premium integrated decompression platforms. Europe has a mature rehabilitation equipment industry and a broad installed base of professional powered traction systems, with Germany, Italy, the United Kingdom, Poland and other

+357 96 030922
info@marketpublishers.com

manufacturing centers contributing to both regional demand and exports.

Asia is increasingly important on both the demand and supply sides. China has developed a broad manufacturing base covering conventional powered traction, multi-dimensional traction and advanced non-surgical spinal decompression systems, while hospital rehabilitation capacity continues to expand. Japan and South Korea maintain established domestic rehabilitation equipment manufacturers, and Taiwan is an important OEM and private-label manufacturing base. India and Southeast Asia remain smaller in absolute market size but offer incremental opportunities as private rehabilitation, physiotherapy and specialty spine services develop.

Competitive Landscape Analysis

The competitive landscape is fragmented and technologically diverse. North American suppliers such as Excite Medical, North American Medical Corporation, Hill Laboratories, Pivotal Health Solutions, Enovis and Universal Pain Technology Canada are particularly visible in integrated decompression and clinic-oriented systems. European manufacturers including Zimmer MedizinSysteme, BTL Industries, gbo Medizintechnik, CHINESPORT, EMS Physio, Technomex and F?ZYOMED maintain established positions in professional rehabilitation and powered traction equipment. Japan and South Korea are represented by ITO, NIHON MEDIX, Minato Medical Science, OG Wellness Technologies, HanMed, SHINHWA Medical and Young Il M, while Taiwan-based suppliers such as Everyway Medical Instruments and ZMI Electronics combine branded products with OEM capabilities. China has a comparatively broad manufacturer base led by companies including XIANGYU MEDICAL, Zhengzhou Waixingcang Medical Equipment, KANGLIREN Medical, Shandong Zepu Medical Technology, Suzhou Haobro Medical Device, Guangzhou Yikang Medical Equipment, Anhui Ryzur Medical Equipment Manufacturing and Jiangsu Rixin Medical Equipment. Competition is increasingly determined by control accuracy, treatment flexibility, system integration, regulatory capability, manufacturing cost and after-sales service rather than by traction force specifications alone.

Report Scope

This report is a detailed and comprehensive analysis for global Non-Surgical Spinal Decompression and Powered Traction Systems market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and

+357 96 030922
info@marketpublishers.com

by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Non-Surgical Spinal Decompression and Powered Traction Systems market size and forecasts, in consumption value ($ Million), sales quantity (Units), and average selling prices (US$/Unit), 2021-2032

Global Non-Surgical Spinal Decompression and Powered Traction Systems market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Units), and average selling prices (US$/Unit), 2021-2032

Global Non-Surgical Spinal Decompression and Powered Traction Systems market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Units), and average selling prices (US$/Unit), 2021-2032

Global Non-Surgical Spinal Decompression and Powered Traction Systems market shares of main players, shipments in revenue ($ Million), sales quantity (Units), and ASP (US$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Non-Surgical Spinal Decompression and Powered Traction Systems

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

+357 96 030922
info@marketpublishers.com

This report profiles key players in the global Non-Surgical Spinal Decompression and Powered Traction Systems market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Excite Medical of Tampa Bay LLC, North American Medical Corporation, Hill Laboratories Company, Pivotal Health Solutions, Inc., Ergo-Flex Technologies, LLC, Mettler Electronics Corp., Enovis Corporation, Haven Innovation Inc., Universal Pain Technology Canada Inc., BTL Industries, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Non-Surgical Spinal Decompression and Powered Traction Systems market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Chapter Outline

Chapter 1, to describe Non-Surgical Spinal Decompression and Powered Traction Systems product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Non-Surgical Spinal Decompression and Powered Traction Systems, with price, sales quantity, revenue, and global market share of Non-Surgical Spinal Decompression and Powered Traction Systems from 2021 to 2026.

Chapter 3, the Non-Surgical Spinal Decompression and Powered Traction Systems competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Non-Surgical Spinal Decompression and Powered Traction Systems breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and Non-Surgical Spinal Decompression and Powered Traction Systems market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Non-Surgical Spinal Decompression and Powered Traction Systems.

Chapter 14 and 15, to describe Non-Surgical Spinal Decompression and Powered Traction Systems sales channel, distributors, customers, research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Market Analysis by Type
  1.3.1 Overview: Global Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Integrated Table Systems
  1.3.3 Standalone Traction Units
  1.3.4 Seated Traction Systems
  1.3.5 Other
1.4 Market Analysis by Treatment Region
  1.4.1 Overview: Global Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Treatment Region: 2021 Versus 2025 Versus 2032
  1.4.2 Lumbar Systems
  1.4.3 Cervical Systems
  1.4.4 Combined Cervical Lumbar Systems
  1.4.5 Other
1.5 Market Analysis by Application
  1.5.1 Overview: Global Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Application: 2021 Versus 2025 Versus 2032
  1.5.2 General Hospital Rehabilitation Departments
  1.5.3 Rehabilitation Hospitals
  1.5.4 Spine Specialty Clinics
  1.5.5 Chiropractic Clinics
  1.5.6 Physiotherapy Centers
  1.5.7 Other
1.6 Global Non-Surgical Spinal Decompression and Powered Traction Systems Market Size & Forecast
  1.6.1 Global Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value (2021 & 2025 & 2032)
  1.6.2 Global Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity (2021-2032)
  1.6.3 Global Non-Surgical Spinal Decompression and Powered Traction Systems Average Price (2021-2032)

3 COMPETITIVE ENVIRONMENT: NON-SURGICAL SPINAL DECOMPRESSION AND POWERED TRACTION SYSTEMS BY MANUFACTURER

3.1 Global Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Manufacturer (2021-2026)
3.2 Global Non-Surgical Spinal Decompression and Powered Traction Systems Revenue by Manufacturer (2021-2026)
3.3 Global Non-Surgical Spinal Decompression and Powered Traction Systems Average Price by Manufacturer (2021-2026)
3.4 Market Share Analysis (2025)
3.4.1 Producer Shipments of Non-Surgical Spinal Decompression and Powered Traction Systems by Manufacturer Revenue ($MM) and Market Share (%): 2025
3.4.2 Top 3 Non-Surgical Spinal Decompression and Powered Traction Systems Manufacturer Market Share in 2025
3.4.3 Top 6 Non-Surgical Spinal Decompression and Powered Traction Systems Manufacturer Market Share in 2025
3.5 Non-Surgical Spinal Decompression and Powered Traction Systems Market: Overall Company Footprint Analysis
3.5.1 Non-Surgical Spinal Decompression and Powered Traction Systems Market: Region Footprint
3.5.2 Non-Surgical Spinal Decompression and Powered Traction Systems Market: Company Product Type Footprint
3.5.3 Non-Surgical Spinal Decompression and Powered Traction Systems Market: Company Product Application Footprint

+357 96 030922
info@marketpublishers.com

3.6 New Market Entrants and Barriers to Market Entry
3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

4.1 Global Non-Surgical Spinal Decompression and Powered Traction Systems Market Size by Region
  4.1.1 Global Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Region (2021-2032)
  4.1.2 Global Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Region (2021-2032)
  4.1.3 Global Non-Surgical Spinal Decompression and Powered Traction Systems Average Price by Region (2021-2032)
4.2 North America Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value (2021-2032)
4.3 Europe Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value (2021-2032)
4.4 Asia-Pacific Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value (2021-2032)
4.5 South America Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value (2021-2032)
4.6 Middle East & Africa Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value (2021-2032)

5 MARKET SEGMENT BY TYPE

5.1 Global Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Type (2021-2032)
5.2 Global Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Type (2021-2032)
5.3 Global Non-Surgical Spinal Decompression and Powered Traction Systems Average Price by Type (2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Application (2021-2032)
6.2 Global Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Application (2021-2032)

+357 96 030922
info@marketpublishers.com

6.3 Global Non-Surgical Spinal Decompression and Powered Traction Systems Average Price by Application (2021-2032)

7 NORTH AMERICA

7.1 North America Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Type (2021-2032)
7.2 North America Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Application (2021-2032)
7.3 North America Non-Surgical Spinal Decompression and Powered Traction Systems Market Size by Country
  7.3.1 North America Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Country (2021-2032)
  7.3.2 North America Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Country (2021-2032)
  7.3.3 United States Market Size and Forecast (2021-2032)
  7.3.4 Canada Market Size and Forecast (2021-2032)
  7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Type (2021-2032)
8.2 Europe Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Application (2021-2032)
8.3 Europe Non-Surgical Spinal Decompression and Powered Traction Systems Market Size by Country
  8.3.1 Europe Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Country (2021-2032)
  8.3.2 Europe Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Country (2021-2032)
  8.3.3 Germany Market Size and Forecast (2021-2032)
  8.3.4 France Market Size and Forecast (2021-2032)
  8.3.5 United Kingdom Market Size and Forecast (2021-2032)
  8.3.6 Russia Market Size and Forecast (2021-2032)
  8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

+357 96 030922
info@marketpublishers.com

9.1 Asia-Pacific Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific Non-Surgical Spinal Decompression and Powered Traction Systems Market Size by Region
9.3.1 Asia-Pacific Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Region (2021-2032)
9.3.2 Asia-Pacific Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Region (2021-2032)
9.3.3 China Market Size and Forecast (2021-2032)
9.3.4 Japan Market Size and Forecast (2021-2032)
9.3.5 South Korea Market Size and Forecast (2021-2032)
9.3.6 India Market Size and Forecast (2021-2032)
9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Type (2021-2032)
10.2 South America Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Application (2021-2032)
10.3 South America Non-Surgical Spinal Decompression and Powered Traction Systems Market Size by Country
10.3.1 South America Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Country (2021-2032)
10.3.2 South America Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Country (2021-2032)
10.3.3 Brazil Market Size and Forecast (2021-2032)
10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Type (2021-2032)
11.2 Middle East & Africa Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa Non-Surgical Spinal Decompression and Powered Traction

+357 96 030922
info@marketpublishers.com

Systems Market Size by Country
11.3.1 Middle East & Africa Non-Surgical Spinal Decompression and Powered Traction Systems Sales Quantity by Country (2021-2032)
11.3.2 Middle East & Africa Non-Surgical Spinal Decompression and Powered Traction Systems Consumption Value by Country (2021-2032)
11.3.3 Turkey Market Size and Forecast (2021-2032)
11.3.4 Egypt Market Size and Forecast (2021-2032)
11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)
11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 Non-Surgical Spinal Decompression and Powered Traction Systems Market Drivers
12.2 Non-Surgical Spinal Decompression and Powered Traction Systems Market Restraints
12.3 Non-Surgical Spinal Decompression and Powered Traction Systems Trends Analysis
12.4 Porters Five Forces Analysis
12.4.1 Threat of New Entrants
12.4.2 Bargaining Power of Suppliers
12.4.3 Bargaining Power of Buyers
12.4.4 Threat of Substitutes
12.4.5 Competitive Rivalry

I would like to order

Product name: Global Non-Surgical Spinal Decompression and Powered Traction Systems Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/G6F37F2C2911EN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G6F37F2C2911EN.html
