Abstracts

According to our (Global Info Research) latest study, the global Non-woven Fabric Butyl Tape market size was valued at US\$ 260 million in 2025 and is forecast to a readjusted size of US\$ 378 million by 2032 with a CAGR of 5.5% during review period.

In 2025, global sales volume of Non-woven Fabric Butyl Tape is estimated at approximately 110 million square meters, with an average market price of around USD 2.3 per square meter. The gross margin of major manufacturers in the industry is generally estimated at about 25%?38%.

Non-woven Fabric Butyl Tape is a functional waterproofing and sealing tape made with butyl rubber as the main self-adhesive sealing layer and non-woven fabric laminated on the surface. It typically consists of a butyl adhesive layer, a non-woven facing layer, and a release liner. The product features good self-adhesion, flexibility, waterproofing performance, air tightness, and substrate adaptability, enabling it to form a continuous sealing layer on various substrates such as concrete, metal sheet, ceramic tile, plastic, glass, and wood. Compared with aluminum foil butyl tape, the non-woven facing is more suitable for subsequent coating with waterproofing materials, mortar covering, or surface finishing, making it better suited for building joint waterproofing, crack repair, and concealed sealing applications.

The upstream materials of Non-woven Fabric Butyl Tape mainly include butyl rubber, tackifying resin, filler, softener, non-woven fabric, and release liner. In the midstream, products with different thickness, width, and facing structures are manufactured through mixing, coating, lamination, slitting, and packaging processes. Downstream applications are mainly concentrated in building construction, underground engineering, industrial

equipment, and transportation equipment, where the tape is used for waterproofing, sealing, and reinforcement at wall-floor joints, roof overlaps, window and door joints, pipe roots, cracks, metal panel seams, equipment housings, and vehicle body joints. With the increasing demand for building maintenance, waterproofing renovation, prefabricated construction, and industrial sealing, non-woven butyl tape shows strong application value in detail joint treatment and rapid repair scenarios.
