Non-woven seat covers are non-woven fabric products made from polypropylene (PP), polyester (PET), or composite fibers through heat sealing, needle punching, or meltblowing processes. They are used to cover seat surfaces to prevent dust, liquids, oil stains, and cross-contamination. They provide low-cost protection, prevent seat soiling, and improve hygiene and lifespan. The average price of this product is approximately US\$180 per thousand pieces, with global sales of approximately 3.18 million units.

Upstream supply relies on polypropylene granules, PET fibers, and functional additives (antibacterial/waterproof); downstream applications are concentrated in automotive repair, medical clinics, and aviation transportation. Future trends include biodegradable materials, antibacterial functions, and smart label traceability, driving the product towards environmental protection and high added value.
