Abstracts

According to our (Global Info Research) latest study, the global Nonionic Polyacrylamide market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Nonionic polyacrylamide is a water-soluble polymer. Because its molecular chain contains a certain number of polar groups, it can bridge between particles by adsorbing solid particles suspended in water or agglomerate particles to form large flocs through charge neutralization. Therefore, it can accelerate the settling of particles in the suspension, and has a very obvious effect of accelerating solution clarification and promoting filtration. It is suitable for sludge dewatering, organic sewage treatment, paper making enhancement, oilfield chemical additives, textile sizing, etc.
