Abstracts

According to our (Global Info Research) latest study, the global Norbornane Diisocyanate (NBDI) market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The Norbornane Diisocyanate (NBDI) market is a small but growing market. NBDI is a type of isocyanate used in the production of high-performance coatings, adhesives, and elastomers. It is known for its excellent chemical resistance, durability, and low temperature flexibility. These properties make it a popular choice for use in industrial coatings, automotive coatings, and aerospace applications.

The market for NBDI is expected to grow due to its increasing use in the production of polyurethane coatings and adhesives, which are used in a wide range of applications including automotive, construction, and electronics. In addition, the growing demand for high-performance coatings and adhesives in emerging economies is expected to boost the market for NBDI in the coming years.

However, the market growth may be limited by the high cost of NBDI compared to other isocyanates and the availability of substitutes. The use of NBDI is also subject to strict regulations due to its potential health hazards, which could further limit its market growth.

This report is a detailed and comprehensive analysis for global Norbornane Diisocyanate (NBDI) market. Both quantitative and qualitative analyses are presented
